The bestselling Deuter ACT Lite 65 + 10 pack is the perfect adventure companion for any backpacking trip. With a comfortable carrying system, Vari-Quick back length adjustment, and gear attachment loops throughout, this pack will comfortably take you high above or miles into some of the most beautiful terrain you can find.

Highlights of ACT Lite 65+10

Lid pocket
stores quick-grab gear.

Pocket on hip belt
to accommodate valuables or a digicam.

Front Pocket
provides easy access to all important small essentials.

Compression straps
for reducing pack volume and improved load stability also can be used to attach extra gear.

SOS-Label
provides the most important tips in case of emergency

Stretch Compartment
compartment to stowe sweaty/wet clothes

Valuables Pocket
special pocket on the inside of the pack to keep valuable items safe

Aircontact System
Aircontact Back System

Vari Quick System
For easy adjustment to any back length.

X-Frame
X-Frame Construction

Spring Steel Frame
The round spring steel frame is very lightweight and flexible. It is extremely durable, provides stable tension for the back mesh and transfers the load to the hip belt. Its flexibility guarantees great freedom of movement and a perfect fit.

Adjustable Lid
Height adjustable lid closure

Bottom Compartment
With removable separator for ideal gear access and load placement.

Side Pockets
stretch side pockets provide additional storage space

Padded Hip Belt
An additional padding on the hip belt provides more carrying comfort.

Hydration System 3.0 L
Compatible
compatible with Streamer 2.0 I & Streamer 3.0 I

Attachment for ice axe or hiking poles
ice axe and hiking pole loops - also for foldable poles

Optimally suitable for

Trekking

Ski Touring

Travelling

Climbing

Huts

Back System: Deuter Aircontact Lite System

- 1 The anatomic profiled X-frame transfers weight on the hips. The crossed aluminium stays create a flexible, yet stable internal frame that follows your body movements.
- 2 The VariQuick system allows an easy, quick adjustment to the individual back length.
- 3 The load adjustment straps on the shoulder straps add extra stability. The special "Triglide" buckles ensure easy positioning.
- 4 Anatomically S-shaped shoulder straps with airy 3D AirMesh lining guarantee perfect fit and great ventilation.
- 5 Light, slim and anatomically shaped: the hip wings ensure even load distribution. Their soft foam with breathable 3D AirMesh lining offers outstanding comfort. The firm foam on the outside is modelled to the anatomic shape and transfers the load to the hips. Side compression straps regulate weight transfer and add extra stability.
- 6 Our Aircontact system sits close to the wearer's back and features pads with a special, breathable hollow chamber foam. The pads perform a pump effect, whereby every movement prompts the exchange of air. The result: 15% less perspiration than with other body-contour packs.

Material

PES 600

Made from 600 den Polyester thread and with a thick PU coating, this multi-purpose fabric is robust and lightweight. It is most suitable for backpacks, used in average conditions to keep the weight to a minimum.

Dynajin 210

We use the Nylon material in hard wearing 420 denier and 210 denier density. Special high density denier polyamide offers high abrasion resistance with its very tight weave. This top quality fabric is used for Guide backpacks and Travel range models. PU coating.

210 Baby Rip / 210 Bright RS

Ultra-tight weave, hard wearing 210 Denier Nylon. Recognisable by the very technical, shiny surface incorporating tough Ripstop threads. This lightweight and extremely robust fabric is perfectly suited to the manufacture of lightweight products. Top quality PU coating. This highly technical material is used for lightweight Alpine and Trekking models.
